Arch Hardware Custom Drink Rails

Drink rails, or scrappers, are frequently required for busy commercial bar tops. Drink rails are often stainless steel and they keep the bar serving area clean and sanitary, as well as providing a work area for bartenders.

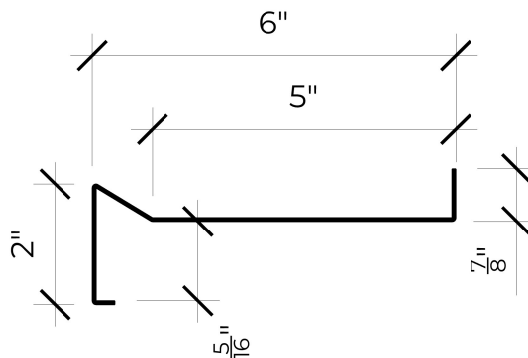

La Bastille will order your drink rails and dry fit them upon request. We work exclusively with Arch Hardware, fabricators or quality professional grade drink rails. La Bastille and Arch Hardware work together to ensure made to order drink rails integrate with La Bastille custom bar tops. Various sizes and finishes are available for selection.

If you're considering a drink rail for your bar top, let us know so we can provide accurate pricing and we will handle this coordination for you.
